Oil and Gas Conservation Commission
State Capitol Building
Salt Lake City 14, Utah

Attention Cleon B. Feight, Secretary

Gentlemen:

This letter is a request for the Oil and Gas Conservation Commission of the State of Utah to grant permission to International Oil and Metals Corporation to drill a well for oil or gas in the center of the SW-1/4 of lot 4, Section 4, T. 20 S., R. 24 E., Grand County, Utah. This location is in the center of a 10 acre tract, 330 feet east of the west line of the section.

This request for a ten acre location is based upon geologic conditions as follows:

Oil and gas in this part of Grand County are produced from lenses of porous, sandstone within bentonitic shale. The sand lenses are generally small and extremely lenticular. Permeability is quite variable. It is believed that ten acre well spacing or multiples thereof is necessary in order to discover and properly develop oil fields in such lenticular sands.

This location is on acreage obtained from Carter Oil Company and, under the terms of our agreement, a well must be spudded within 15 days of today's date. Therefore, it is necessary for us to make this request before the current hearing on spacing in the area is concluded. Prompt action by the Commission will be appreciated.

Very truly yours

Robert P. Kunkel
